

RM Easimaths

Parent Information Sheet

What is RM Easimaths?

RM Easimaths is an online Maths learning system which is simple and fun, with or without support. It combines engaging activities with a personal learning programme to meet your child's individual needs.

Activities

There are over 4000 activities for pupils to complete; covering Early, First and Second levels of Curriculum for Excellence. Pupils are presented with a wide range of activities which each practise a different skill. Once they master a skill they progress onto a more challenging skill.

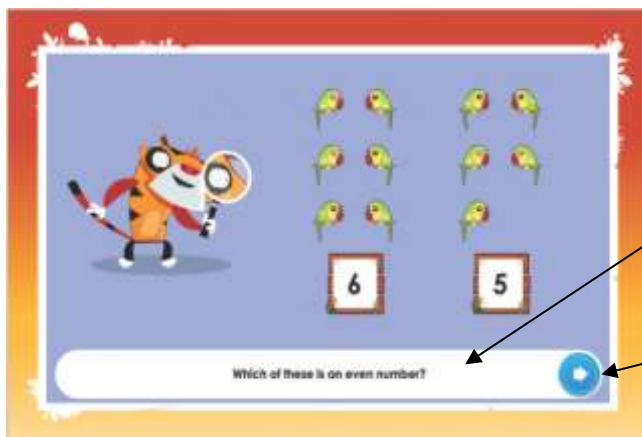

Device

The programme can be used on PC, Mac, iPad and Android devices. RM Easimaths is accessed through GLOW which is a website and can be found using a search engine such as Goggle. The pupils type in their GLOW username and password to access GLOW and then click on the RM Easimaths tile. For an easier route pupils can download the RM Easimaths app and log in using their GLOW username and password.

Using RM Easimaths

When pupils are using RM Easimaths it is important they have somewhere quiet to work. The questions are read out so they will need speakers or headphones.

Each session lasts for 15 minutes and ends with a reward game called 'Fling-a-ball'.

Learners should wait for the question voice over to finish.

The question will remain at the bottom of the screen.

They can change the answer as many times BEFORE clicking the blue button to submit.

If your child gets a question wrong it will appear red

- 1st time wrong- they get another chance
- 2nd time wrong- they receive some help and explanation before another chance
- 3rd time wrong- they are given the answer and methodology

It is important that you **DO NOT** give your child the answer!

Let them work through the activities themselves otherwise they may miss learning and explanation in areas that they need support in.
